### Spørsmål om faktura på kommunale avgifter

Refers to your inquiry request for municipal taxes on gbnr. 314/338.

Municipal water and sewerage charges are calculated according to the cost principle. Indre Fosen municipality cannot charge higher fees than is necessary for the service to go to zero.

The price list for municipal fees and the fee regulations was adopted by the municipal council in December 2019 and December 2018.

The municipalities consist of a fixed part and a consumption part of water and drains.

The fixed part is today's date of kr. 1.902,- (+25% VAT) for water and kr. 1.585,- (+25%) for drainage, this is the same for all households in Indre Fosen municipality. This has increased by about 3 % since last year.

For your home, water consumption and draining are calculated as follows:

#### Water (2020):

$149\text{m}^2 * 1,5$  (factor passed by the municipal council) which will be  $223\text{m}^3$ . This year, factor has been included in the unit price for water, which means that the unit prices this year in NOK  $15 * 1,5$  which becomes 22,50,- per unit square meters. The consumption part of water will then be NOK 4.190,64 this year.

#### Water (2019):

$149\text{m}^2 * 1,25$  (factor passed by the municipal council) which becomes  $186\text{m}^3$ .

$186\text{m}^3 * \text{unit price}$  which was NOK kr. 13,-. The consumption part of water will then be NOK 3.022,52,- this year.

#### Drain (2020):

$149\text{m}^2 * \text{unit price}$  NOK 8,- per square meter. The consumption part of drains will be NOK 1.490,- for this year.

#### Drain (2019):

$149\text{m}^2 * 1,5$  (factor passed by the municipal council) which becomes  $186\text{m}^3$ .

$186\text{m}^3 * \text{unit price}$  which was NOK kr. 8,-. The consumption part of drains will be NOK 1.860,- for this year.

The drain has gone down in price while the water has run out up in price due to the cost principle (consuming part)

I hope this was clarifying.

*Fantastiske  
Fosen*
